

FULL NAME: Meher Jahnavi

PROFESSIONAL SUMMARY: Highly skilled Full Stack Developer with expertise in designing, developing, testing, deploying, and maintaining scalable and secure web applications across the full stack. Proven ability to write clean, efficient, and well-documented code, both for front-end user interfaces and back-end server-side logic, APIs, and databases.

TECHNICAL SKILLS:

- Front-end Development: Expert in implementing responsive and intuitive user interfaces using modern front-end frameworks and libraries.
- Back-end Development: Proficient in developing and managing robust APIs and RESTful services for seamless data exchange between front-end and back-end systems.
- Database Management: Experienced in working with various database technologies (SQL and NoSQL) to design schemas, write optimized queries, and manage data integrity.
- Code Review: Regularly participate in code reviews, providing constructive feedback and contributing to best practices and coding standards.
- Debugging: Skilled in debugging, troubleshooting, and resolving software defects and technical issues.
- Continuous Learning: Always stay up-to-date with emerging technologies and industry trends, applying them to improve development processes and products.

WORK EXPERIENCE:

Full Stack Developer | Company Name | Dates

- Collaborated with product owners and designers to translate UI/UX designs and business requirements into technical specifications and functional features.
- Ensured the performance, scalability, security, and reliability of applications.
- Contributed to all phases of the software development lifecycle, from planning and design to deployment and maintenance.
