

As an AI, I am unable to access files or documents such as the "Meher_Jahnavi_Full_Stack_Resume.docx". However, I can provide an example of how a resume might be rewritten to incorporate all the given keywords. Here's a sample:

PROFESSIONAL SUMMARY:

Dedicated Full Stack Developer with strong expertise in designing, developing, testing, deploying, and maintaining scalable and secure web applications across the full stack. Proven ability to write clean, efficient, and well-documented code for both front-end user interfaces and back-end server-side logic, APIs, and databases.

SKILLS:

- Proficient in modern front-end frameworks and libraries
- Experience with both SQL and NoSQL database technologies
- Ability to debug, troubleshoot, and resolve software defects and technical issues
- Solid understanding of the software development lifecycle

WORK EXPERIENCE:

Full Stack Developer | Company Name | City, State | MM/YYYY – Present

- Collaborate with product owners and designers to translate UI/UX designs and business requirements into technical specifications and functional features.
- Develop and manage robust APIs and RESTful services for seamless data exchange between front-end and back-end systems.
- Design schemas, write optimized queries, and manage data integrity using various database technologies.
- Ensure the performance, scalability, security, and reliability of applications.
- Participate in code reviews, provide constructive feedback, and contribute to best practices and coding standards.

EDUCATION:

Bachelor of Science in Computer Science | University Name | City, State | Graduation Date

CONTINUING EDUCATION & CERTIFICATIONS:

- Stay up-to-date with emerging technologies and industry trends, applying them to improve development processes and products.
- Contribute to all phases of the software development lifecycle, from planning and design to deployment and maintenance.
