

PROFESSIONAL SUMMARY:

Experienced Full Stack Developer with a proven track record in designing, developing, testing, deploying, and maintaining scalable and secure web applications across the full stack. Expert at writing clean, efficient, and well-documented code for both the front-end user interfaces and back-end server-side logic, APIs, and databases. Adept at collaborating with product owners and designers to translate UI/UX designs and business requirements into technical specifications and functional features.

SKILLS:

- Comprehensive experience in developing and managing robust APIs and RESTful services for seamless data exchange between front-end and back-end systems.
- Proficient in implementing responsive and intuitive user interfaces using modern front-end frameworks and libraries.
- Extensive knowledge in working with various database technologies (SQL and NoSQL) to design schemas, write optimized queries, and manage data integrity.
- Capable of ensuring the performance, scalability, security, and reliability of applications.
- Experienced in participating in code reviews, providing constructive feedback, and contributing to best practices and coding standards.
- Skilled at debugging, troubleshooting, and resolving software defects and technical issues.

PROFESSIONAL DEVELOPMENT:

- Dedicated to staying up-to-date with emerging technologies and industry trends, applying them to improve development processes and products.
- Active contributor to all phases of the software development lifecycle, from planning and design to deployment and maintenance.

WORK EXPERIENCE:

Full Stack Developer
Company Name
Dates of employment

Responsibilities:

- Designed, developed, tested, deployed, and maintained scalable and secure web applications.
- Wrote clean, efficient, and well-documented code for both front-end and back-end systems.
- Collaborated with product owners and designers to translate designs into technical specifications.
- Implemented user interfaces using modern front-end frameworks and libraries.
- Managed robust APIs and RESTful services for data exchange.
- Worked with SQL and NoSQL technologies to manage data integrity.
- Ensured application performance and reliability.
- Participated in code reviews and contributed to coding standards.
- Debugged and resolved software defects and technical issues.
- Stayed current with emerging technologies and industry trends to improve products and processes.

- Contributed to all phases of the software development lifecycle.

EDUCATION:

Bachelor's Degree in Computer Science
